Python

Projects

[Google Books Search MERN App](#)

Search and save books from the Google Books API.

-- React, Node.js, MongoDB, Express, Google Books API --

[Timed Code Quiz](#)

Gives the user a timed, multiple choice quiz on JavaScript. Their final score is based on how quickly and accurately they complete the quiz.

-- HTML, CSS, JavaScript, local storage usage --

[Weather Forecast Web App](#)

Search for any city in the US and get the current weather forecast, as well as the five-day forecast for that location.

-- HTML, CSS, Bootstrap, JavaScript, APIs --

[Rate Your Roommate](#)

Similar to the concept ratemyproffessors.com, except applied to roommates!

-- MySQL, Express, Node.js, JavaScript, BCrypt, HTML, CSS, Pure CSS --

[Password Generator](#)

Retrieves randomly generated passwords based on user-inputted specifications.

-- HTML, CSS, Bootstrap, JavaScript --

[COVID-19 Disaster Tracker](#)

Shows nationwide COVID-19 case and death totals by state and by county, as well as nearby hospitals and other useful disaster information for any county in the US.

-- React, MongoDB, Node.js, Bootstrap, react-chartjs-2, React-Leaflet --
